SECTION 1

Platform Overview

Architecture, technology stack, and key system capabilities

MOJO RPMS is a web-based Reservation & Payment Management System built for travel and safari tour operators. It provides end-to-end management of tours, clients, bookings, and payment installments, with automated email reminders and comprehensive audit logging.

Technology Stack

- **Backend:** Laravel 12.0 (PHP)
- **Frontend:** Blade Templates, Bootstrap 5.3.3, Bootstrap Icons
- **Database:** SQLite
- **Authentication:** Session-based with RBAC (Admin / Manager / Viewer)
- **Typography:** Inter (Google Fonts)
- **Theme:** Light / Dark mode with localStorage persistence

Key Capabilities

- Multi-currency support (USD, EUR, BRL, etc.)
- Automated email reminders at configurable intervals before/after payment due dates
- Real-time dashboard with payment and booking KPIs
- Role-based access control with three permission tiers
- Full activity and email audit logging
- Responsive design with dark mode support

SECTION 2

Authentication

User login and registration flows

2.1 Login

`GET /login`

Features

- Email and password authentication
- "Remember Me" checkbox for persistent sessions
- Form validation with inline error messages
- Link to registration page for new users

2.2 Registration

`GET /register`

Features

- Self-service user registration
- Fields: Name, Email, Password, Password Confirmation
- Minimum 8-character password requirement
- Automatic redirect to dashboard upon registration

Both pages use a standalone auth layout with a centered card and MOJO branding. They are only accessible to non-authenticated (guest) users.

SECTION 3

Operational Dashboard

Real-time overview of reservations, payments, and recent activity

`GET /` ALL USERS

Booking Summary Cards

Key Metrics Displayed

- **Total Bookings** — overall count of all reservations
- **Pending** — bookings awaiting confirmation
- **Confirmed** — bookings that have been confirmed
- **Completed** — bookings that have been fulfilled

Payment Status Cards

Installment KPIs

- **Due Soon** — installments due within the next 7 days
- **Due Today** — installments due on the current date
- **Overdue** — installments past their due date
- **Paid** — installments that have been settled
- **Missing Link** — link-method installments without a payment URL
- **Currency Totals** — pending amounts aggregated by currency

Data Tables

Upcoming Installments

Table showing installments due within the next 7 days: due date, client, tour, amount, currency, and payment status.

Overdue Installments

Table showing past-due installments with the number of days overdue, including a direct link to the booking detail page.

Recent Activity

Feed of the last 10 system actions (tour created, booking updated, payment registered, etc.) with timestamps and entity links.

SECTION 4

Tour Management

Create, organize, and track travel packages and their capacity

4.1 Tour List

`GET /tours` ALL USERS

Features

- Paginated list of all tours with configurable items per page (10, 25, 50, 100)
- **Filters:** Type (Group, Private, Agency, Influencer), Status (Active, Inactive), text search by name or code
- **Table columns:** Code, Name, Type, Currency, Travelers (with capacity bar), Status, Actions
- Capacity progress bar: green (<70%), amber (70-90%), red (>90%)
- Quick actions: View details, Edit, Toggle active/inactive status

4.2 Tour Details

`GET /tours/{id}` ALL USERS

Features

- Full tour information: Code, Name, Type, Currency, Status, Max Travelers, Notes
- Traveler count card with visual capacity bar and percentage
- "Full" badge displayed when tour reaches maximum capacity
- Associated bookings table listing all reservations linked to the tour
- Action buttons: Edit tour, Back to list

4.3 Create / Edit Tour

`GET /tours/create` `GET /tours/{id}/edit`

Form Fields

- **Code** — unique tour identifier
- **Name** — tour display name
- **Type** — Group, Private, Agency, or Influencer
- **Currency** — default currency for the tour
- **Max Travelers** — capacity limit
- **Notes** — optional description or internal notes
- **Status** — Active / Inactive (available on edit only)

SECTION 5

Client Management

Maintain your client database and view their booking history

5.1 Client List

`GET /clients` ALL USERS

Features

- Searchable list of all clients by name or email
- **Table columns:** Name, Email, Booking Count, Actions
- Quick actions: View details, Edit, Delete (with confirmation)
- Pagination support

5.2 Client Details

`GET /clients/{id}` ALL USERS

Features

- Client profile: Name, Email (clickable mailto link), Notes
- Associated bookings table showing tour, date, value, currency, and status
- Quick-create button to add a new booking for this client

5.3 Create / Edit Client

`GET /clients/create` `GET /clients/{id}/edit`

Form Fields

- **Name** — client full name
- **Email** — contact email address
- **Notes** — optional notes about the client

SECTION 6

Booking Management

Manage reservations, installments, and payment tracking

6.1 Booking List

`GET /bookings` ALL USERS

Features

- Paginated list with configurable items per page (10, 25, 50, 100)
- **Filters:** Status (Pending, Confirmed, Cancelled, Completed), Tour, text search
- **Table columns:** ID, Client, Tour, Start Date, Travelers, Total Value, Status, Actions
- Currency and status badges
- Quick actions: View, Edit, Delete (with confirmation)

6.2 Booking Details & Installments

`GET /bookings/{id}` ALL USERS

Booking Information

- Full details: ID, Client (linked), Tour (linked), Start Date, Currency, Total Value, Travelers, Status, Notes
- Discount notes section

Installment Management

- **Summary cards:** Total installments count, Sum of installment amounts, Difference from booking total
- **Installments table:** #, Amount, Due Date, Method, Payment Link, Status, Last Email Sent, Actions
- **Actions per installment:** Mark as Paid, Edit (modal), Resend Email, Delete
- **Add Installment:** Modal form with amount, due date, payment method, and optional payment link
- **Payment methods:** Link, PIX, Wise
- Color-coded rows: green (paid), red (overdue), amber (missing link)

6.3 Create / Edit Booking

`GET /bookings/create` `GET /bookings/{id}/edit`

Form Fields

- **Client** — select from existing clients
- **Tour** — select from existing tours (or enter manually)
- **Start Date** — booking start date
- **Currency** — payment currency
- **Total Value** — booking total amount
- **Travelers** — number of travelers
- **Discount Notes** — optional discount description
- **Status** — Pending, Confirmed, Cancelled, Completed
- **Notes** — general notes

SECTION 7

Payment Cockpit

Centralized installment monitoring, filtering, and management

`GET /pagamentos` ALL USERS

Summary Cards

- **Pending** — count of pending installments
- **Paid** — count of paid installments
- **Overdue** — count of overdue installments
- **Missing Link** — installments with link method but no URL
- **Currency Totals** — pending amounts grouped by currency

Advanced Filters

- Status (Pending, Paid, Overdue, Missing Link)
- Payment method (Link, PIX, Wise)
- Tour selection
- Date range (from / to)
- Text search by client or tour name
- Configurable results per page (10, 25, 50, 100)

Installments Table

- **Columns:** Status, Due Date, Client, Tour, Installment #, Amount, Currency, Method, Link, Last Email, Actions
- **Color-coded rows:** Red (overdue), Amber (missing link), Green (paid)
- **Actions:** Mark as Paid, Edit (redirects to booking), Resend Email, Toggle Email Automation (pause/resume)

The Payment Cockpit provides a cross-booking view of all installments, making it the primary tool for day-to-day payment operations and follow-ups.

SECTION 8

Email Templates

Design and manage email templates used for payment reminders and notifications

8.1 Template List

`GET /email-templates` ALL USERS

Features

- Templates organized by type in collapsible accordion cards
- Count badge showing number of templates per type
- Table per type: Name, Subject (truncated), Actions
- Quick actions: Edit, Preview (opens in new tab), Delete

8.2 Create / Edit Template

`GET /email-templates/create` `GET /email-templates/{id}/edit`

Form Fields

- **Name** — internal template identifier
- **Type** — template category
- **Subject** — email subject line (supports placeholders)
- **Body** — email body content with placeholder support

8.3 Template Preview

`GET /email-templates/{id}/preview`

Features

- Rendered preview of the email template
- Shows subject and body with sample placeholder values

SECTION 9

System Settings

Configure payment messages, email automation, and SMTP settings

`GET /configuracoes` ADMIN MANAGER

Payment Messages

Customize messages displayed for each payment method (Link, PIX, Wise). These messages are included in payment emails sent to clients.

PIX Instructions

General PIX payment instruction template with bank details and transfer guidelines.

Email Automation

- Toggle automatic email sending at each interval:
- 7 days before due date
- 3 days before due date
- On the due date
- 1 day after due date
- 7 days after due date

SMTP Configuration

- Mail Host and Port
- Username and Password
- Encryption method (TLS / SSL)
- From Name and From Email address

Cron Information

Instructions and cron command for setting up the Laravel task scheduler that powers automated email sending.

SECTION 10

Logs (Email & Activity)

Audit trails for all system actions and email communications

`GET /logs` ADMIN MANAGER

Email Logs Tab

Features

- **Filters:** Date range, Trigger type (Manual / Automatic), Search by client
- **Table columns:** Date/Time, Client, Template, Subject, Status (Sent / Failed), Trigger Type, Actions
- **View action:** Opens modal with full email content
- Pagination and empty state handling

Activity Logs Tab

Features

- **Filters:** Date range, Entity type (Tour / Client / Booking / Installment), Search by action
- **Table columns:** Date/Time, Action, Entity Type, Entity ID, IP Address, Details
- **Details action:** Opens modal with JSON-formatted activity data
- Full audit trail of all CRUD operations in the system

SECTION 11

User Management

Manage system users and assign roles

`GET /users` ADMIN ONLY

User List

- **Table columns:** Avatar + Name, Email, Role, Created Date, Actions
- Color-coded role badges: Admin (red), Manager (yellow), Viewer (gray)
- "You" indicator on the currently logged-in user
- Actions: Edit, Delete (cannot delete yourself)

Create / Edit User

- **Name** — user display name
- **Email** — login email address
- **Password** — required on create, optional on edit
- **Role** — Admin, Manager, or Viewer

SECTION 12

User Profile

View and edit personal account settings

`GET /perfil` **ALL USERS**

Profile Information

- Avatar with gradient background and user initial
- Editable fields: Name, Email
- Read-only display: Role (with colored badge), Member since date

Change Password

- Current password verification
- New password with confirmation field
- Minimum 8-character requirement

SECTION 13

Role-Based Access Control (RBAC)

Permission matrix defining access levels across the platform

Role Definitions

ADMIN **Administrator**

Full system access. Can manage all resources including users, settings, and logs.

MANAGER **Manager**

Access to all operational modules. Can manage tours, clients, bookings, payments, settings, and view logs. Cannot manage users.

VIEWER **Viewer**

Read-only access to dashboard, tours, clients, bookings, and payments. Cannot create, edit, delete, or access administration pages.

Permission Matrix

MODULE / ACTION	ADMIN	MANAGER	VIEWER
Dashboard	✓	✓	✓
Tours — View	✓	✓	✓
Tours — Create / Edit	✓	✓	×
Clients — View	✓	✓	✓
Clients — Create / Edit / Delete	✓	✓	×
Bookings — View	✓	✓	✓
Bookings — Create / Edit / Delete	✓	✓	×
Payment Cockpit — View	✓	✓	✓
Payments — Mark Paid / Send Email	✓	✓	×
Email Templates	✓	✓	×
System Settings	✓	✓	×

MODULE / ACTION	ADMIN	MANAGER	VIEWER
Logs (Email & Activity)	✓	✓	×
User Management	✓	×	×
Profile (own)	✓	✓	✓

SECTION 14

Common UI Patterns & Design

Shared design patterns and interface conventions used across the platform

Navigation & Layout

- **Sidebar:** Dark sidebar with MOJO branding, grouped navigation (Principal, Operacional, Sistema, Administracao), user profile section at bottom
- **Top Bar:** Sticky header with page title, subtitle, theme toggle (light/dark), and user info
- **Theme:** Light and dark mode with seamless toggle and localStorage persistence

Data Display

- **Stat Cards:** Color-coded KPI cards with icons for quick metric overview
- **Data Tables:** Paginated, filterable tables with action buttons and color-coded rows
- **Status Badges:** Consistent color-coded badges (Pending, Confirmed, Active, Overdue, etc.)
- **Currency Badges:** Styled currency indicators (USD, EUR, BRL)
- **Empty States:** Friendly messages when no data matches current filters

Interaction Patterns

- **Filter Bars:** Consistent filtering interface with search, dropdowns, and date pickers
- **Modal Forms:** In-page forms for quick actions (add/edit installments)
- **Confirmation Dialogs:** Required for destructive actions (delete, mark as paid)
- **Accordion Sections:** Collapsible groups for settings and template organization
- **Tabs:** Tabbed interfaces for related data views (Email / Activity logs)

Responsive Design

- Mobile-responsive layout with collapsible sidebar
- Scrollable data tables on small screens
- Bootstrap 5.3.3 grid system for adaptive layouts
